

3D Range Improvement Project

2011 tasks (Updated 06/14/2011):

We've listed the Major and Normal Maintenance tasks as well as a (very rough) estimate of the time required to complete them. If you're so inclined, please tackle the things on the list and let the archery committee know. This is a great way to get your service hours in and have a stake in the chapter.

Major Projects:

- Reconstruct bridge/walkway over creek at 25.
- Replace all the target bags on the practice range.
- Replace the worn/rotted 3D targets.

Notes:

WATCH OUT FOR POISON IVY

Specific Tasks by Target

Trim a 2 foot circle around each of the colored shooting pins at each target as needed. **(90 minutes)**

Repaint all pins at all targets with existing colors. **(2 hours)**

Spray paint can be found black plastic "Milk Crate" near the door to the Archery House.
